

	WHERE I WAS IN THE APP	WHAT I WAS TRYING TO DO	WHAT I EXPECTED TO HAPPEN	WHAT ACTUALLY HAPPENED
1	Bar Bet Screen	Figure out the stats on each card so I know what I'm betting	To be able to see the stats for each card before choosing to stake it	The Bar Bets Stakes window showed me my options without the ability to see each card's stats
2	Bar Bet Screen	Was going to pick a card to stake but you told me that once the card is selected it is automatically staked	I expected to have the option to confirm that the selected card is the one I want to stake	Nothing happened; I haven't placed a bar bet yet
3	Deck Builder Screen	Edit Village Constable deck by adding additional cards	To see only the cards currently in the deck	No way to tell which cards were in Village Constable deck and which ones were not
4	Deck Builder Screen: Family Drop-Down Menu	Figure out the Family color-schemes	I hoped to see a colored symbol (or similar) next to the Families in the drop-down menu	The Families are listed but there is not visual connection between the drop-down menu list and the cards available for building.

	WHERE I WAS IN THE APP	WHAT I WAS TRYING TO DO	WHAT I EXPECTED TO HAPPEN	WHAT ACTUALLY HAPPENED
5	Deck Builder Screen	Use the border colors to determine which cards belong to which family	I expected that border colors would relate to family	• Current border color reflects rarity rather than family • I know that Legendary cards are sparkly; could Legendary cards retain sparkle but have a colored sparkle that matches family color
6	Main Game-Play Screen	Playing against opponent	When opponent plays Instant Card I expected card to remain on table	• Instant Cards: animation is moving too quickly, have not been able to catch play before card disappears • Would prefer card to remain on table
7	House Rules Screen	Scroll to see all information	To be able to scroll the screen	Scrolling for this screen works on phone but not on laptop
8	General Gameplay	Once game is uploaded as and App	• Hoping that game can be auto-saved as an App • Would like to be able to skip tutorial on re-plays	

	WHERE I WAS IN THE APP	WHAT I WAS TRYING TO DO	WHAT I EXPECTED TO HAPPEN	WHAT ACTUALLY HAPPENED
9	Main Game-Play Screen	Play a regular game	I expected more cards to be added to my hand after playing a card	Hand consists only of cards dealt at beginning of hand; cannot get new cards to increase odds of winning or making a synergistic play.
10	Deck Builder Screen	Build a new deck	Is Charlotte supposed to be part of the Yard family? Her card's border color seems to indicate yes.	
11	Deck Builder Screen	Build a new deck	What does the green border for cards mean? The Family/Type isn't obvious.	
12	Deck Builder Screen	Add cards to new deck	Select a card and have the screen stay "static"	Each time I picked a new card to add to my hand the screen jumped back to the top of the page; just a little annoying to have to scroll down after each selection.

	WHERE I WAS IN THE APP	WHAT I WAS TRYING TO DO	WHAT I EXPECTED TO HAPPEN	WHAT ACTUALLY HAPPENED
13	Main Game-Play Screen	Play against Sir Charles	I played Inspector's Warrant (flip opposing cards worth three or less); I though the instruction that popped up when I selected the card said to pick one or more card to flip. Is that right?	Only one card flipped. That does make sense but, just wanted to make sure that the additional instructions that came with selecting the card are correct.
